

## Objectives and Strategies

The objectives of the West Valley School District are:

- to provide a safe physical environment that enhances the educational process as the West Valley School District continues to grow.
- to have all of our students successfully complete their individual achievement program.
- to have all students enter into productive endeavors following the successful completion of their educational programs.
- to have all students learn what is essential for success at their next appropriate level.

These objectives can be achieved by the following strategies:

1. We will implement expanded age and ability appropriate learning opportunities to ensure that all students meet state standards, extend their learning, experience challenge and move into their adult roles as responsible citizens.
2. We will maintain our facilities to a high standard to ensure a safe, secure and healthy learning environment while maximizing the longevity of our facilities and equipment.
3. We will expand our ability to understand differing views in a diverse world and we will model acceptance, inclusion, and respect of individuals.
4. We will build trust, ownership and collaboration throughout West Valley by enhancing communication\* and involvement\*\* within our community.

\*communication is two-way, listening and providing information

\*\*involvement is two-way, community involved in the schools and schools involved in the community
